

## The 17 Chakra System

The 17 Chakra System was channeled and received from the Elohim by Jhadten Jewall the day after the Conclave of Lord Michael in Banff Canada in March 1994.

It is the foundation of his work in the world, activating the Cities of Light and the Lightbodies of Mankind. Born in Canada, he is one Heart with the Mission of Canada: to breathe the Breath of God into the crystalline structures of Reality, activating the Lightbodies of Earth and Mankind for the New Millennium of Peace on Earth.

The following diagram will illustrate the transpersonal and Earth chakras as well as how they are integrated into the body. The Elohim explained that during this time of an expansion of our localized consciousness to a place of global consciousness (media, internet, satellites etc express the outward manifestation of our global consciousness), a new system of energy awareness would be needed. Up until this point the traditional 7 chakra System as we have inherited it from India and other cultures, has served us well in understanding our energy fields. In this time of transition from 3rd through 4th into 5th density realms of energy and awareness, we need to be aware of more aspects of our energy fields. As everything in our lives has become more complex to make life easier, so our understanding of our energy fields becomes more complex in order to live with ease and grace during these times of transition. The vague idea or visualization of grounding now becomes a science of clear levels of awareness. As the Earth has definite geological layers and levels, so too our body consciousness. Grounding into each successive layer of the Earth is creating a definite connection to a level of body awareness, being conscious of a level of energy in our bodies; this is absolutely necessary in order to know where to ground, embody the higher vibrations of our soul energy, the transpersonal chakras. Becoming familiar with the Earth Chakras means creating the space and possibility to actually embody the higher frequencies of your soul: the deeper the grounding, the higher the frequencies that can be embodied. Becoming familiar therefore, means to embody a level of energy awareness. This is the step from 3rd into 4th density reality. This is the step from an instinctive and reactive reality based on fear, separation and romance to a reality of inner freedom through detachment. Here we begin to become 'we' instead of 'me'. As the integrated, embodied chakras fuse with the traditional chakras and lift the vibration even higher, shifting the centre of the chakra higher resp. to a more precise centre (crown and base), we experience the shift from 4th to 5th density realms of energy: this is the shift from inner freedom to realizing that nothing can be more fulfilling and satisfying than becoming pure channels of divine will. This is a movement towards enlightenment and the 'we' now becomes 'one', unity in diversity, global peace and harmony, a golden age is born. This is an alchemical process, that is described by the Elohim in Jhadten's channelings. At the moment he is writing an extensive book on the subject which is due to be finished Jan 2005. In the meantime, the cassette tape "The 17 Chakra Meditation" not only introduces the system but also has a guided journey on Side B that facilitates the alchemical process of activating the chakras of the 5th dimension. The power and the love of the Elohim is encoded into the voice and music, providing the listener with a direct experience of the power of this knowledge. Listen to the tape and not only your intellect but your whole brain shall grasp the import of this system. This was a clear directive of the Elohim as well. Below, the diagrams which illustrate the system as well as a link to the order page where you can order the tape.
